Mandatum Life SICAV-UCITS – Nordic High Yield Total Return Fund - Share class A EUR cap.

(ISIN: LU1112754756).

Mandatum Life SICAV-UCITS – Nordic High Yield Total Return Fund (the “Fund”) is a sub-Fund of Mandatum Life SICAV-UCITS (the “Company”). This Fund is managed by Mandatum Life Fund Management S.A. which is part of the Mandatum Life Group.

Objectives and Investment policy

The Fund invests mainly in the Nordic corporate bond markets. The Fund seeks long-term returns that exceed typical returns for medium-term fixed income investments. The Fund suits investors who seek higher returns than those typical for normal fixed income investments and accept the risk typically associated with bonds with a low credit rating. The Fund’s assets are mainly invested in bonds that have no credit rating or have a credit rating of no more than BB+ (Standard & Poor’s) or Ba1 (Moody’s) or a similar rating from another credit rating agency. The Fund can also invest outside the Nordic countries in order to benefit from sector diversification or to replace individual Nordic investments and thus achieve a better risk-return ratio.

In addition, the Fund can invest in other publicly traded debt securities, deposits, money market instruments, collective investment

schemes in the fixed income markets and investment baskets as well as derivative contracts.

The Fund may use fixed income, foreign exchange, credit and other derivatives to hedge investments, to achieve effective portfolio management and/or to carry out its investment strategy. Leverage for the Fund may not exceed 200% of the Fund’s net asset value. The Fund does not have a benchmark index.

This share class does not distribute income; instead the return on investments is reinvested. However, distribution of the returns can be decided by the board of directors of the Company. Investors can subscribe and redeem shares of the Fund on days which are banking days in both Luxembourg and Finland.

Recommendation: This Fund may not be appropriate for investors who plan to withdraw their money within three years.

Risk and reward profile

The Fund’s risk category describes the relationship between risk and reward and fluctuations in the Fund share’s performance. As the Fund does not have sufficient performance history data, the Fund’s risk category has been calculated using the Fund’s investment-strategy-based simulation over the past five years. The Fund’s current risk category is 3. Historical data may not be a reliable indication for the future.

The Fund’s risk category is based on a mathematical formula which does not take into account impairments, political risks or unpredictable fluctuations in interest rates or exchange rates. Even the lowest risk category (1) is not fully risk-free.

The category shown is not guaranteed and may shift over time. It is not possible to predict the risk and reward profile or future developments in the risk category based on the historical data of the Fund’s risk category. A complete description of risk factors is set out in the prospectus in the “Risk Factors Annex”.

Following risks should also be considered when investing in the Fund, since they may not be fully included in the risk indicator.

Counterparty risk: The Fund’s counterparties may fail to pay the proceeds on the sale of securities or fail to deliver purchased securities. The Fund’s OTC derivative counterparties may fail to meet their obligations during the life of OTC derivative contracts.

Derivatives risk: Derivatives are used to increase, decrease or maintain the risk level of the Fund. If the Fund’s derivatives strategy fails, the Fund could suffer significant losses.

Event risk: Unpredictable events such as sudden devaluations of foreign currencies or political events.

Operational risk: Disruptions or delays in operational processes may affect the Fund negatively.
